Would You Pay Fifty Cents a Week for a Servant?

Electricity is the world's most efficient household
 servant.

Electricity, for lighting and the commonest house-
 hold tasks, can be furnished the average home for
 about \$2.00 a month at the usual rates for current.
 This allows energy for daily use of the vacuum
 cleaner, weekly use of washing machine and elec-
 tric iron, and light for every room during the hours
 you need it.

Wire Your Home on Easy Terms

All the time you are paying you will be enjoying
 your new comfort. Remember—there is almost no
 end to the tasks that can be either performed or
 made easier by electricity—no limit to the com-
 forts it will bring you—and all at small cost.
